

Workflow

ESKA® Workflow is a dynamic business process management (BPM) system that provides powerful digital acceleration for a fast and orderly enterprise. With ESKA Workflow, you can manage the full lifecycle of any operational process while also automating routine tasks and strengthening your employees' collaboration channels. It can also supplement any software system you already rely on, letting you build and modify forms and processes on the fly to engage unique challenges and opportunities flexibly.

ESKA Workflow provides the following features:

- Dynamically configurable organization chart
- Flexible step-by-step process builder
- User-friendly form builder
- Rules-based workflow engine
- Client-side workflow
- Role-based access control with advanced security standards.

Key Features

- Visual Process Designer
- Visual Forms Builder
- User Side
- Workflow Monitoring
- Employee Replacement
- Menu Builder
- Email Templates
- Workflow Notifications
